Bradley Hanson – City Administrator
City of Mondovi
156 South Franklin Street
Mondovi, WI 54755

To Whom It May Concern:

Our company is in the process of relocating to the City of Mondovi. We have been very impressed with the efforts that the City staff and elected officials have recently undertaken to improve the community. We are excited to become part of this community.

The City of Mondovi has made large strides with improving our community's appearance and transportation needs. This includes the Mirror Lake dredging, new pavilion, and the redevelopment of Sharp's Point Park on the eastern shoreline. The Common Council understands the need for connectivity for its residents and business community to be able to enjoy these amenities and has developed its 2018 Comprehensive Outdoor Recreation Plan (CORP), which is consulted during the City's annual budget decision making process. The aforementioned improvements are included within the CORP and as the Park Board of Commissions are stating, we are "Making Mondovi Majestic."

We are supporting the City's majestic endeavor for our community, as the improved and new roads will enhance our business environment and the trails will improve the City's connectivity for all. We support this through efforts of our engineering abilities, resources, or in-kind work.

Sincerely,

Oakridge Engineering, Inc.
