The Corporate Headquarters for Marten Transport, Ltd. has been in the City of Mondovi since 1965; where I grew up, went to school, and call home. They are making great strides and improvements to this community to make it more attractive to new and existing businesses and residents alike. Their plans to make the City more attractive include not just a new Industrial Park, but to ensure the existing Industrial Park improves in the occupancy of businesses and connectivity. This connectivity includes increased life and development of their existing and new roads, which when developed they look to include a trail system up to and within business areas and residential neighborhoods.

Roads are a vital part of business, Marten Transport, Ltd. included, as we are in the business of moving supplies and manufactured products across the nation; including essential food, goods, products and services during the Coronavirus (COVID-19) pandemic. One of our maintenance facilities is also located in Mondovi's existing Industrial Park, with trucks coming in on a daily basis. Having good roads reduces wear and tear to our vehicles, and having a total package in transportation needs being met helps us to recruit applicants that want recreational opportunities during their family time, and break times at work. Marten Transport, Ltd. Has been a proud supporter of this community for a long time, and will continue to support the City with its endeavor with its transportation and recreational trail improvements. We would not only like to support this project, but will discuss a financial assistance with this project at its next appropriate committee meeting.

Sincerely,  
  
Randy Marten
